SHIVA SINGH

Delhi, India | +91 9910260553 | shivaaa1917@gmail.com

LinkedIn Profile | **LeetCode Profile**

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate with hands-on experience in Machine Learning, Deep Learning, Data Analytics, and Backend Software Development. National Winner at Smart India Hackathon (SIH) 2025. Skilled in designing scalable AI solutions, predictive modeling, Natural Language Processing (NLP), and RESTful API development using Python, FastAPI, Django, and PyTorch. Certified Innovation Ambassador for Ministry of Education's Innovation Cell.

TECHNICAL SKILLS

Languages:	Python, C, C++, SQL (MySQL), JavaScript, HTML5/CSS3
ML & Analytics:	Scikit-Learn, PyTorch, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, NLP, NLTK
Frameworks & Web:	FastAPI, Django, Node.js, React, RESTful APIs
Tools & Platforms:	Power BI, Git/GitHub, VS Code, Jupyter Notebook, Google Colab
Core Concepts:	Machine Learning, Data Analysis, DBMS, OOPs, Data Structures & Algorithms, OS

PROFESSIONAL EXPERIENCE

Airports Authority of India (AAI) **July 2025 – August 2025**

Web Development Intern Delhi, India

- Architected and deployed a secure Asset Management System streamlining inventory tracking across airport departments.
- Implemented robust authentication and role-based authorization protocols to maintain employee data privacy and system security.
- Engineered an automated ticketing module using Python & Django, reducing internal issue resolution response times by 30%.

YBI Foundation **July 2024 – August 2024**

AI / Machine Learning Intern Remote

- Gained hands-on experience in exploratory data analysis (EDA), statistical modeling, and data preprocessing using Pandas and NumPy.
- Built, evaluated, and fine-tuned supervised machine learning regression and classification models with Scikit-Learn.

KEY PROJECTS

AI-Based Accreditation Predictor System (SIH Winning Project) **2025**

Technologies: Python, Machine Learning, Scikit-Learn, JavaScript, MongoDB, REST API

- Spearheaded a 6-member team to victory at SIH 2025 by engineering an AI accreditation model for UGC/AICTE.
- Developed predictive ML algorithms analyzing historical institutional metrics to calculate approval probabilities with high accuracy.
- Automated manual screening workflows, drastically reducing evaluation cycles for regulatory approvals.

Financial & Public Sentiment Analysis Pipeline **2026**

Technologies: Python, NLTK, VADER, PyTorch, Pandas, Scikit-Learn, Matplotlib

- Designed an end-to-end Natural Language Processing (NLP) pipeline to analyze public sentiment and financial market news trends.
- Preprocessed large-scale text data using tokenization, lemmatization, and TF-IDF vectorization to extract key market signals.
- Achieved 89% classification accuracy using supervised ML models to categorize text into Positive, Neutral, and Negative polarity.

Enterprise Asset & Service Management Portal **2025**

Technologies: Python, Django, HTML5, CSS3, JavaScript, MySQL

- Developed a centralized asset tracking application featuring encrypted credentials, role management, and detailed ticketing systems.

EDUCATION

Jagannath University **August 2022 – July 2026**

Bachelor of Technology (B.Tech) in Computer Science & Engineering CGPA: 8.5 / 10

HONORS, AWARDS & CERTIFICATIONS

- **National Winner – Smart India Hackathon (SIH) 2025:** Led 6-member team to build AI accreditation system for UGC/AICTE.
- **Certified Innovation Ambassador:** Ministry of Education's Innovation Cell (MIC) & Institution's Innovation Council.
- **Programming Fundamentals using Python:** Certified by Infosys.
- **Fundamentals of Object-Oriented Programming:** Certified by IIT Roorkee.
